

# BattleWeb Overview

<https://battleweb.army.mil>

## Service Offerings

- Logistics mission planning tool developed for the Army Sustainment Command (ASC) and Forces Command (FORSCOM) to support the APS Program and OEF/OIF missions
- Provides the warfighter, movement officers, and other planners with a single portal for deployment planning and asset visibility
- Provides up-to-date visibility of different equipment sets including Army Pre-positioned Stock (APS), Theater Provided Equipment (TPE), Installation Equipment (INS), and Pre-Deployment Training Equipment (PDTE)
- Web application available to anyone with an Army Knowledge Online (AKO) account and Internet access at <https://battleweb.army.mil>
- Pre-deployment training available at no cost through FORSCOM Pre-Deployment Assistance Team (PDAT)

## Supported Areas of Operation

- Instant access to near real-time APS information
  - APS 2 (Europe)
  - APS 3 (Afloat)
  - APS 4 (Northeast Asia: Korea, Japan)
  - APS 5 (Southwest Asia: Afghanistan, Kuwait, Qatar)

- Instant access to near real-time OEF and OIF information
  - Afghanistan
  - Iraq
  - Kuwait
- Instant access to information for Pre-Deployment Training Equipment (PDTE) positioned at 14 different Continental United States (CONUS) sites

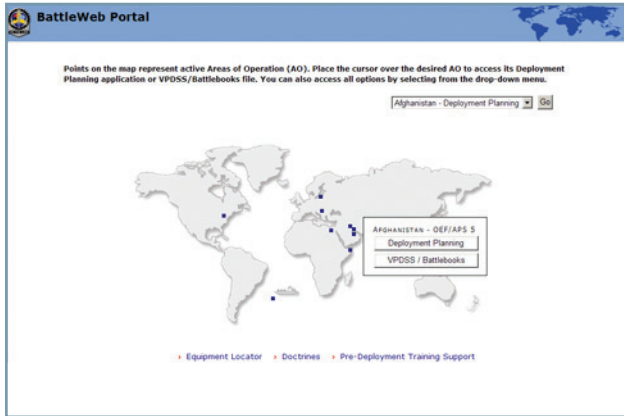

## Capabilities

- Battlebooks/Virtual Pre-Deployment Site Survey (VPDSS) and Doctrines
  - View Army doctrinal, site-specific, and detailed procedural information
- Checklist
  - Create customized checklists to facilitate deployment planning
  - Standardized checklists are included for common scenarios
- Deployment Equipment List/Unit Deployment List (DEL/UDL)
  - View what's available at the contingency area, what you need to take with you, what you need to requisition to fulfill shortages, and what is not authorized for deployment per DA
  - Created based on Standard, Comparison, and MTOE Plus processes based on selected AO and user-provided information
- Equipment List
  - View list of equipment at Line Item Number (LIN), NSN/Serial Number, and BII/SKO/COEI/AAL\* level
- Reports
  - Unit Property List: an "all-in-one" report that displays a comprehensive list of equipment for the selected Unit
  - View equipment by LIN, Model Number, Property Book Identification Code (PBIC), Serial Number, or Supply Class for a selected Unit
  - Create a listing of all up-armored vehicles or Rough Terrain Cargo Handlers (RTCH)
  - View reference listings of Condition Codes, Supply Classes, PBICs, or Do Not Deploy (DND) items by LIN
- Training Support
  - Access information on FORSCOM PDAT program and request training on BattleWeb
- Unit Selector
  - Search for units by Unit Identification Code (UIC) or unit name
  - View unit organizational structure by branch or location

\* BII/SKO/COEI/AAL: Basic Issue Items/Sets, Kits, and Outfits Components of End Item/Additional Authorization List

# BattleWeb Capabilities

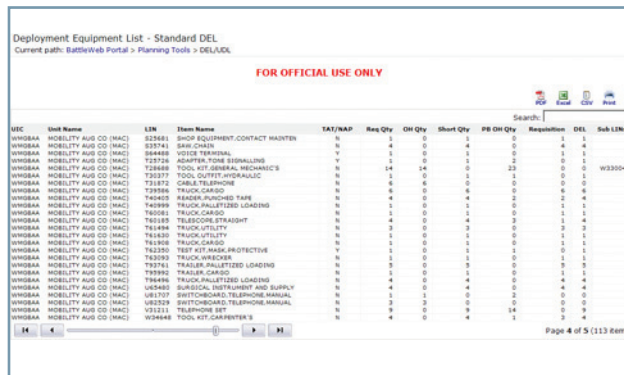

1. Available Areas of Operation (AOs) are displayed in a world map for quick access. By placing the mouse pointer over the desired AO, the available options are displayed.

4. Generate many pre-defined property and reference data-based reports. Output can be saved as Excel, PDF, or Comma Separated Values (CSV).

2. Import a property book file and create a MTOE Plus or Comparison Deployment Equipment List (DEL) for a deploying unit. Property is color-coded in the DEL based on property type, and notification of DND equipment is displayed.

3. View an equipment listing for selected units, and drill down to the LIN, Serial Number (displayed), or BII/SKO/COEI/AAL level.
